Bassam Ashraf Ahmed

Giza, Egypt | +20 1022920668 | bassam.ashraf.cs@gmail.com | bassam-ashraf-cs

Summary

Computer Science and Artificial Intelligence student at Cairo University with hands-on experience building full-stack web and desktop applications through a certified .NET training program. Skilled in C++, Java, Python, and .NET technologies (ASP.NET, Entity Framework), with a solid foundation in databases, algorithms, and software engineering practices. Comfortable working in teams using Git and CI/CD workflows, with additional training in AI for Business covering machine learning, deep learning, agentic AI, and end-to-end data analysis, a Microsoft Machine Learning Engineer track with the Digital Egypt Pioneers Initiative (DEPI) covering prompt engineering, natural language processing, computer vision, Azure AI, and MLOps, and a Power BI track at the Information Technology Institute covering data warehousing, SQL Server, statistics, Power BI, Tableau, and Excel analysis.

Work experience and Interns

AI & Data Science — *Digital Egypt Pioneers Initiative (DEPI)* Jul – Dec 2026

- Prompt Engineering
- Preprocessing & Visualization
- Machine Learning Techniques
- Deep Learning
- Natural Language Processing with Attention Models
- Computer Vision and Transfer Learning
- Azure AI Fundamentals
- Azure AI Engineer Associate
- MLOps Tools, MLflow, and Hugging Face

Power BI Trainee — *Information Technology Institute (ITI)* Aug – Sep 2026

- Data Warehouse
- Advanced SQL Queries
- Microsoft SQLBI
- Power BI
- Tableau
- Excel Analysis
- Generative AI, AI Agents & Workflow Automation

AI Trainee — *National Telecommunication Institute (NTI) — "AI for Business" Summer Course* Jul – Aug 2026

- Completed an intensive 120-hour summer training program in AI for Business at the National Telecommunication Institute.
- Built different types of AI models spanning machine learning and deep learning.
- Explored agentic AI systems and their applications.
- Worked extensively on data analysis, data cleaning, visualization, and feature engineering.

.NET Trainee — *Information Technology Institute (ITI)* Jul – Aug 2025

- Completed a certified 120-hour .NET development course, building a full-stack web application from scratch.
- Gained hands-on experience with ASP.NET, Entity Framework, and core .NET libraries and features.

Education

Bachelor of Science in Computer Science & Artificial Intelligence, *Cairo University*

- Relevant Coursework: Electronics & Logic Design • Database Systems • Web Development • Operating Systems • Machine Learning • Computational Intelligence

Courses

- AI & Data Science - DEPI Microsoft Machine Learning Engineer
- Power BI
- AI for Business
- .NET

Projects

Maintenance Health Machine

- Built and evaluated 5 different AI/machine learning models to predict and monitor machine health.
- Performed extensive data analysis, data cleaning, and feature engineering to prepare raw sensor data for modeling.
- Created visualizations to interpret model outputs and machine health trends.
- Used various tools to test and validate model performance and reliability.

Game Vault

- Built “Game Vault,” a full-scale game distribution and library platform inspired by Steam, developed entirely from scratch using .NET during the .NET internship at the Information Technology Institute.

Advanced Tic Tac Toe Game

- Built a feature-rich Tic Tac Toe application with AI opponent (Minimax algorithm) and multiplayer modes using Qt Designer and SQLite.
- Implemented user authentication, account management, and detailed game statistics (wins, losses, draws, move history).
- Coordinated team collaboration via Git, incorporating CI/CD workflows with GitHub Actions.

Viking Chess (Hnefatafl)

- Designed a historically inspired Viking Chess game with AI opponent powered by the Alpha-Beta Pruning algorithm, as well as a local multiplayer mode.

Technical skills

Languages: C#, C/C++, Java, JavaScript, Python
Frameworks: .NET (ASP.NET, Entity Framework)
Algorithms: Minimax, Alpha-Beta Pruning
AI & Machine Learning: Machine Learning, Deep Learning, Agentic AI, Natural Language Processing, Computer Vision, Prompt Engineering, Model Testing & Evaluation
Business Intelligence: Power BI, Tableau, SQL Server, Data Warehousing, Excel Analysis, Statistics
Tools: Git, GitHub Actions, Qt Designer, SQLite
Databases: SQLite, SQL (general)
Data Science: Data Analysis, Data Cleaning, Data Visualization, Feature Engineering
Cloud & MLOps: Azure AI Fundamentals, Azure AI Engineer Associate, MLflow, Hugging Face

Languages

- Arabic — Native / Mother Tongue • English — Professional Working Proficiency
